WHO ARE WE?

Legacy Lighting is an Australian lighting manufacturer based in Swan Hill, Regional Victoria servicing large area flood lighting projects right across Australia. With over 10 years experience in the lighting industry, Legacy Lighting has developed its own range of high quality LED floods designed and manufactured here in Australia to suit the Australian climate. Through our design principles of simplicity, functionality and effectiveness, we have made LED flood lights not only more cost effective but also more efficient and durable. We are passionate about reducing our carbon footprint and that's why delivering energy savings to lighting projects is our focus.

WHAT WE DO?

Legacy Lighting specialises in the design and manufacture of high quality LED flood lighting solutions for large area lighting applications. We've tailor made the Invictus Series for the sport lighting market, and the result is a lightweight luminaire with unmatched definition, uniformity and performance. Built with the latest technology LEDs and design and manufactured here in Australia, we Define the Moment on every project. We offer the complete sport lighting package with custom lighting designs to meet the needs of your club. We understand the importance of meeting the Australian Lighting Standards while achieving energy efficiency and optimum performance. Our in-house engineers look at every project individually to meet your budget, while reducing energy consumption and giving you enhanced light control. Our project managers can assist with applying for government grants and lodging council permits, to simplify your lighting project and take your facilities to the next level.

WHY CHOOSE LED?

1

INSTANT ON

With LED lighting there is no warm up period or delay once turned off. They are instantly operating at full power.

2

SUPERIOR DEFINITION

LEDs require less wattage to power than metal halide or HPS lights and can be dimmed allowing for maximum saving on your power bills.

3

90% LESS MAINTENANCE

LED require no maintenance for 50,000 hours. Metal halides require globe replacements every 18-24 months.

4

UP TO 65% POWER SAVING

LEDs are available up to 90 CRI which provides clarity and definition. In comparison metal halides depreciate within the first 300 hours and so does the quality of light

THE INVICTUS SERIES

With a striking, low-profile design and advanced in-built thermal management, the Legacy Invictus floodlight is a highly-reliable fitting that requires very low maintenance. Producing a vivid white-light that renders colours as they are meant to be seen, this revolutionary fitting has helped redefine high-output illumination as we know it, helping you Define the Moment.

AUSTRALIAN MADE

The Invictus LED luminaires are manufactured and assembled in Australia using local materials and labour.

LIGHTWEIGHT & FLAT MOUNT

The Invictus Series are constructed with extruded aluminium minimising weight. They are also designed to flat mount, resulting in minimal sail area.

WARRANTY

Our products are covered with a 10 year standard warranty on all Legacy hardware.

APP CONTROL & DALI DIMMABLE

You can gain control of lighting levels or power usage reporting, helping you to optimise the use of the lights which also gives remote dimming which maximises power saving.

INVICTUS DATA SHEET

The Legacy Invictus control gear has wide input voltage range, meaning the same control gear can be used for 240V single phase or 415V 2 phase.

Model No	INVICTUS 400	INVICTUS 600	INVICTUS 800	INVICTUS 1200	INVICTUS 1500
Input Power	400W	600W	800W	1200W	1500W
LED	3535 LED Chips				
Lumen Output	43,200lm	64,800lm	86,400lm	129,600lm	162,000lm
Working Temp	-40°C - +50°C				
Power Factor	>0.9				
Driver (240V & 415V)	1 x 600W	1 x 600W	2 x 600W	2 x 600W	3 x 600W
Protection Class	IP66				
Impact Resistance	IK09				
Earth Connection	Class 1				
Material	Aluminium Body				
Size (excl handle)	540x390x120mm	540x390x120mm	540x390x120mm	540x790x120mm	540x790x120mm
Weight	12kg	16kg	18kg	22kg	26kg
Lifespan	100,000 hours				
Colour Temperature	4000 – 5700K				
Input Voltage	90 – 415VAC, 50/60 Hz				
Beam Type	Narrow/Medium/Wide Asymmetric				
CRI	70-90 Ra				
Dim/RC (optional)	1-10V/DMX/DALI				
Sail Area @ 15°	0.135	0.135	0.135	0.18	0.18
Warranty	10 Year Parts and 5 Year Parts & Labour				
Country of Manufacture	Australia				

eswitch REMOTE CONTROL SYSTEM

SPORTS LIGHTING

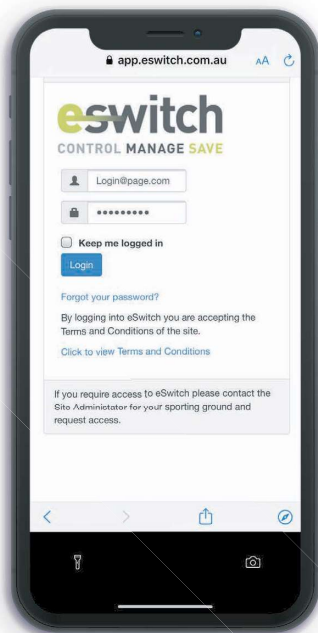

eSwitch has been purpose built for community clubs and organisations, enabling members to securely operate floodlights via their smartphone. This fact sheet provides an overview of how eSwitch provide a comprehensive, user-friendly solution to the challenges clubs face in managing their biggest operational expense.

HOW IT WORKS

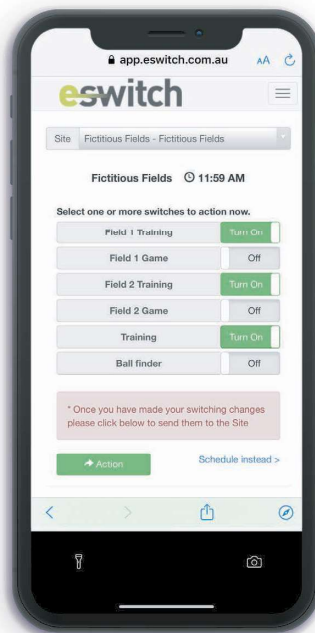

Two components make up the eSwitch system. At the sports field, a secure, weatherproof, vandal proof Control Box houses the electronic equipment and switching accessories. In your hands - your smartphone which, via the Cloud Based application, literally puts the control of your field lights at your fingertips anywhere, any time.

With the simple press of a button in the App, a command is sent to the controller via SMS. The Control Box is fitted with Manual Override Switches as a failsafe if ever your mobile network is down. These can be safely accessed behind the door, which is fitted with high quality, pad-lockable hardware.

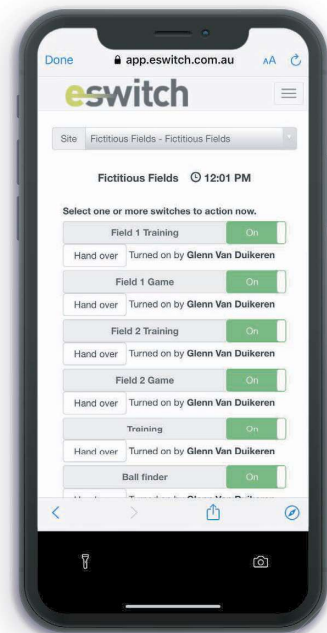

- Keyless operation of lights
- Ability to pre-program the lights to operate automatically
- Give switching access to users with the click of a mouse
- No more lights left on by setting curfews
- Comprehensive reports for accountability and billing
- Hassle free management of third-party field hire.

Secure login from any smartphone or computer

Turn field lights on and off from any location.

Handover feature allows continuous use by multiple users

THE LEGACY PROJECT CYCLE

1. AUDIT

We will conduct a full assessment of your current lighting, to understand your future requirements and then make a recommendation based on this information

2. DESIGN

Our in-house design team will do a design that not only meets the Australian Standards for the sport and obtrusive light, but is also as efficient as possible.

3. MANUFACTURE

The Legacy Asymmetric Series are made in Australia, allowing us full control over every process.

4. SUPPLY & INSTALL

The lights are then installed by a certified electrician. On completion, we conduct a lighting audit to ensure we deliver what we promise.

PARTNERSHIPS

In mid-2020 Legacy Lighting teamed up with Hockey Australia as their official lighting partner. With our expertise and experience in LED sport lighting, Legacy Lighting and Hockey Australia make the perfect pair, while sharing great Australian values and a heritage of success. Our Australia Made product is the idea solution for hockey field lighting and backed up with a 10 year warranty.

“The values around participation, community sport and achieving high performance are really aligned in our businesses so we’re proud to work with a company who shares those values and also that is proudly Australian”. – Matt Favier, HA CEO.

2020 saw Bowls Australia give the green light to a commercial partnership with Legacy Lighting.

“With the increasing demand for bowls clubs to offer year-round and all-conditions access to participants, its important for BA to be able to recommend a leading lighting provider specialising in sports infrastructure with Australian-made product, and we’ve found that in Legacy Lighting”. Neil Dalrymple, BA CEO.
